REQUEST INFORMATION

3 January 2018 - story by materia

The hemp panels are the result of research looking for a way to replace wood and plastic. Hemp is a sustainable crop that can be harvested multiple times per year. Its fibres are the strongest natural fibres.

The panels are lightweight and strong, made only from natural materials. The panels can be produced in any shape

and size. The hemp used for the panels is locally sourced by HempFlax in Groningen, the Netherlands.

Jory Swart is a student at the Academie Minerva in the Netherlands. The panels were developed from research during his studies.

MATERIAL PROPERTIES

SENSORIAL	Channels	TECHNICAL	Articles	Materials	TAGS	Events	Brands
GLOSSINESS	MATTE	FIRE RESISTANCE		POOR	BIOBASED	ECOLOGY	
TRANSLUCENCE	0%	UV RESISTANCE	SEARCH	GOOD	SUSTAINABLE	Sign in	Join now
STRUCTURE	CLOSED	WEATHER RESISTANCE		MODERATE	OTHER NATURALS		
TEXTURE	MEDIUM				HEMP	PANELS	
HARDNESS	HARD	SCRATCH RESISTANCE		GOOD			
TEMPERATURE	WARM	WEIGHT		LIGHT			
ACOUSTICS	MODERATE	CHEMICAL RESISTANCE		MODERATE			
ODOUR	NONE	RENEWABLE		YES
